Full Service Solution

jEDD 
Civils and Construction
A 100% Black Owned Company

“ Jedd is a true reflection of the demographics of South Africa. A 100% black owned company with the reputation and ability to complete major construction projects to the highest standards ”

“ By integrating our services we eliminate wastages from the construction process without compromising the end product ”

JEDD Chairman, Dave Chapman

full circle

After many years of collective experience in the 'boom or bust' construction industry, the JEDD team believed we'd seen it all - but the unprecedented impact of the current global economic downturn has changed that.

As the barometer of a healthy economy, there's no doubt construction will lead the way out of this crisis but, in the process, the business environment has changed forever ... and so must we.

At JEDD, we've always been driven by our key values of quality, safety, integrity, transparency and professionalism – and that will never alter. However, as we've witnessed markets needs change, we've taken a 360° review of our business and reengineered it to meet them.

Countering the trend to package businesses in independent, often unrelated, specialist silos that each cater for distinct aspects of a project, JEDD is getting back to basics and combining its premium skills, expertise and resources to partner clients through every phase of the project lifecycle.

In response to growing market demand for optimum efficiency and cost-effectiveness, we are proud to offer a total turnkey and construction service that delivers from start to finish.

Although standard for the industry's major players, this seamless, integrated approach sets JEDD apart in the mid-tier construction market. As does our expectation that, going forward, the partnerships we build with our clients should last as long as the solutions we design, develop and bring to life for them.

Dave Chapman
JEDD Chairman

the players

Walter Mgiba Eng.Tech (Civil)
Managing Director and Director of Operations

Walter is the spearhead of Jedd!
Walter has led an inspirational life. From his early days at school, through college and now as a mature young leader, he has shown unrivalled ability and leadership.

He has spent 12 years with Jedd, after he completed his studies at Vaal Technikon. 12 years of hard work, listening and learning, so that today his skills are immense.

He is an extremely proficient engineer, manager and leader of men. His reputation attests to his ability to hold council with men and women of all ages, colour and creed. His CV shows the contracts that he has personally managed and completed successfully.

Jedd Civils has deservedly positioned itself as a highly regarded Construction Company mainly operating in the coal mining field.

Walter has been in the forefront of this growth to success, from a young, keen engineer to the position that he now holds, majority shareholder and Managing Director and Director of Operations.

Dave Chapman Pr Eng. Bsc Eng

JEDD Group Chairman

Dave is a registered Professional Engineer and Professional Construction Manager with a Diploma in Financial Management. He has more than 35 years experience in the civil engineering and construction industries, having worked for various companies before starting his own businesses. His contract experience is vast and varied and ranges from: the building of concrete bridges, roads, reservoirs, sewage and water works, township infrastructure, welded pipelines, houses and office buildings, to secure lifestyle cluster complexes, sectional title developments, retirement villages, housing, industrial warehousing, commercial office park and property developments.

Nigel Shoobridge

Director

Nigel has spent 30 years working across all segments of the construction industry and has extensive experience in the mining, materials handling, industrial and agricultural sectors. He holds qualifications in Business and Project Management and his areas of specific expertise include: process plants, conveyors, weighbridge foundations, warehouses, waste paper plants, concrete floors and roads, silos and tunnels. Nigel is the Director in charge of Small Works

page 03

Jason Chapman Bsc Eng

Director

After qualifying as a Mechanical Engineer, Jason spent six years in mechanical design and materials management. This provided an excellent grounding in systems, processes, manufacture and operations - and his subsequent experience in the project management, property development and building/construction fields led to his appointment as Project Manager for the JEDD Group in 2006. Along with expertise in commercial and retail development, he specialises in the development, project-management and marketing of exclusive up-market cluster schemes. Construction fields led to his appointment as Managing Director for the JEDD Group in 2016

“Our ability to measure and manage the operational and financial factors across the Group, ensures the sustainability and profitability of our business, and allows for us to scale up to meet clients' needs effortlessly”

Kobus Kunz

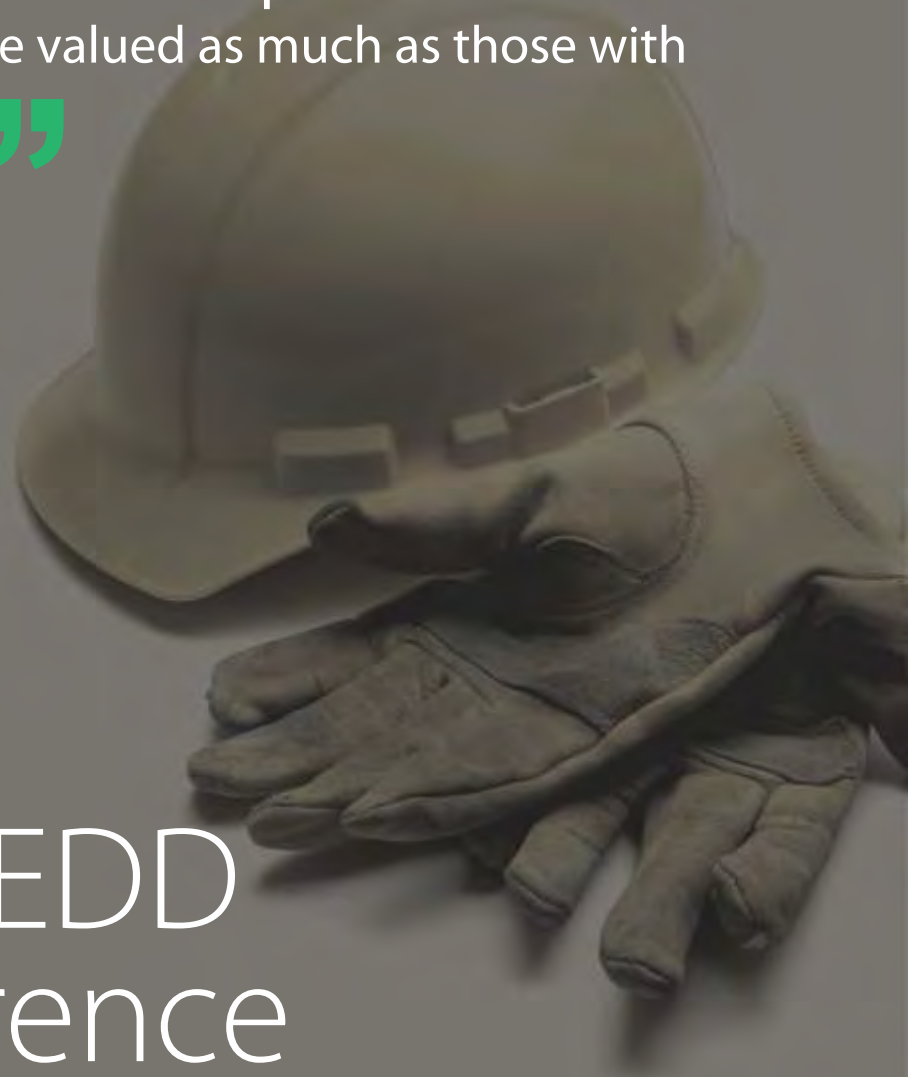

Business Development & Construction Management

Kobus is registered with the SACPCMP as a Professional Construction Manager. He has worked for various 9CE Construction companies since 1980, specializing in Roads and Earthworks. Since 2010 he has been actively involved on coal and Iron Ore mines around the country doing civil structures and mine rehabilitation

“Teamwork is the axis around which the success of every construction project rotates. The partnerships between our own businesses are valued as much as those with our clients”

the JEDD difference

Specialising in contracts between R5m and R200m, JEDD is classified as a mid-tier construction firm, yet it has the same capability as the industry's largest players to offer a 360° service solution to any construction project.

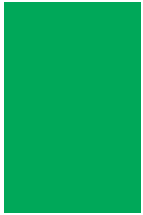

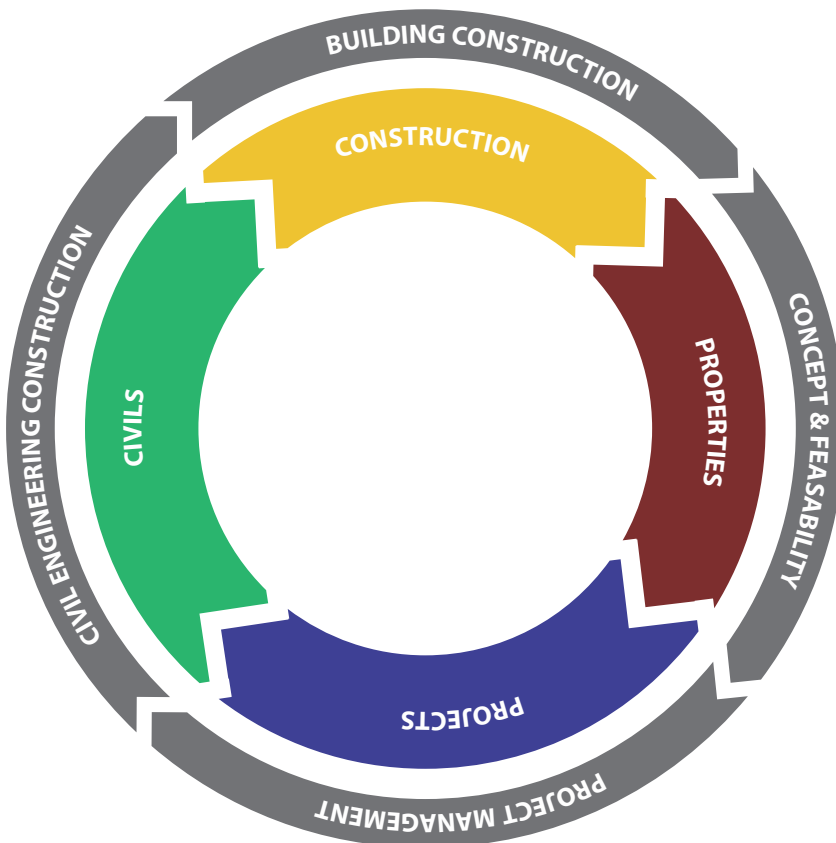

With diverse expertise and experience that cuts across the civil, industrial, retail, commercial and residential sectors, JEDD's clients benefit from partnering with:

- » Top-calibre construction professionals who share an innate understanding of the industry - its demands, its challenges and its complexities plus the technical skill, creative flair and can-do mindset to get the job done.
- » A single, multi-faceted specialist firm which is geared to integrate the civils, building, property development and project management functions effectively.

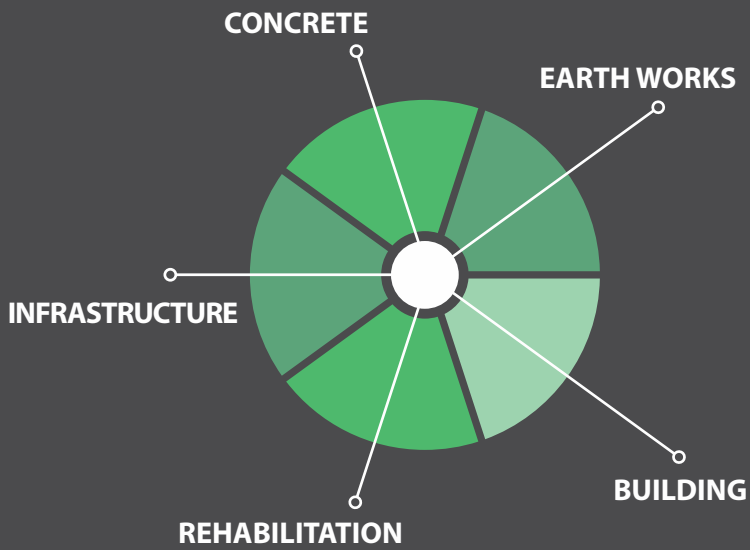

our 360° full service solution

With JEDD, the benefits of the cross-functional synergies the industry giants provide to mega-projects can now be enjoyed by mid-tier clients too:

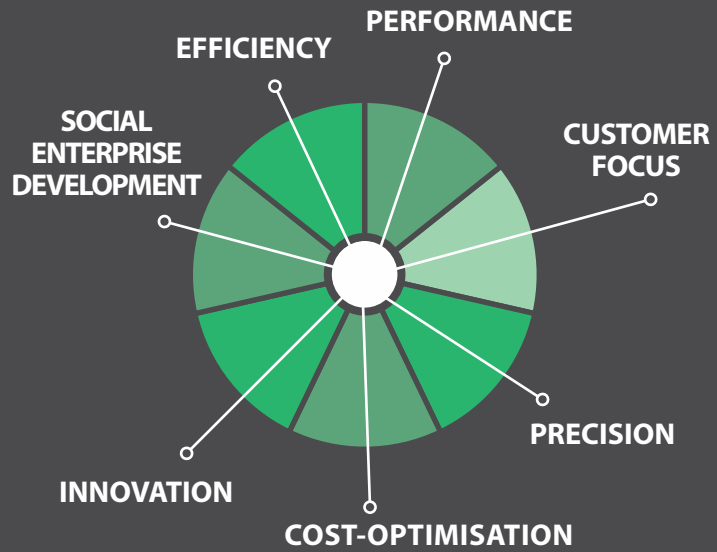

- 1 Single point of contact
- 2 Streamlined reporting process
- 3 Cross-discipline communication
- 4 Smoother project phasing
- 5 Faster progress
- 6 Optimised costs
- 7 Greater operational efficiencies
